**PRELIMINARY
PROGRAM**

Dear colleagues and friends,

On behalf of the European Genito-Urinary Surgeons (eGUS) group we welcome you to Torino for an exciting one and half day meeting dedicated to the most controversial aspects of urological surgical oncology we face in our daily practice. We trust to provide a unique opportunity to assist live surgical procedures such as radical prostatectomy for high risk prostate cancer, radical cystectomy and nephron sparing surgery for kidney cancer performed either with the more conventional open approach or with the minimally invasive technique (laparoscopic or robotic). Live surgery procedures from Molinette Hospital (Turin) and Miami University Hospital (USA) will be alternated by lectures addressing the hottest topics of urological oncology including the role of lymphadenectomy for prostate and bladder cancer and the latest development in the field of medical therapy for advanced prostate and bladder cancer. We warmly welcome the enthusiastic participation of all attendees in the multidisciplinary discussion of surgical cases and the head to head debates between operators of different techniques (including Prof Dipen Parekh that will fly to Torino after his live procedure in Miami to represent the "American view" of urological surgical oncology).

See you in Torino!
