Nr	Standard	Substandards	Tipo / tempistica
<b>Section 1 - Standards and items to set up a PCU: general requirements and critical mass.</b>			
<b>0</b>	<b>Mandatory requirements</b>  <b>Critical mass</b>	1. European Prostate Cancer Units are structures managing sufficient volume of patients with on-site interdisciplinary and multiprofessional teams and infrastructures,	1. Obbligatorio – subito
		2. PCU need not necessarily be a geographically single entity (separate buildings with reasonable proximity)	2. Obbligatorio - subito
		3. If PCUs are organized as multiple entities in separate buildings, patients must be managed and followed up by a single interdisciplinary and multiprofessional team	3. Obbligatorio - subito
		4. Certified PCUs should be allowed to network and outsource services to complete the path of care	4. Obbligatorio - subito
<b>1</b>	<b>PCU curative and supportive care</b>	1. PCU'S should be able to provide interdisciplinary and multiprofessional curative and supportive care for patients across their prostate cancer pathway - from newly diagnosed through to advanced disease	1. Obbligatorio - subito
<b>2</b>	<b>PCU General recommendations</b>	1. PCU should provide interdisciplinary and multiprofessional continuous education on all aspects of prostate cancer care, including research, either for junior staff or for students or on a national or international basis.	1. Obbligatorio – un anno
		2. The unit should actively aim to enroll patients in clinical trials and research	2. Obbligatorio – un anno

**tmd**

TEAM MULTIDISCIPLINARE URO ONCOLOGICO

Nr	Standard	Substandards	Tipo / tempistica
3	Identified director or leader	1. An identified director or leader (a MD or a PhD from any specialty of the core team, responsible for the coordination)	1. Obbligatorio - subito
4	PCU Critical mass	1. More than 100 newly registered cases of prostate cancer discussed in the interdisciplinary and multiprofessional team meetings treated or monitored by PCU each year	1. Obbligatorio - subito
		2. All immediate and deferred treatments and observational protocols must be carried out under the guidance of the PCU MD team	2. Obbligatorio - subito
		3. Adjuvant and palliative therapies as well as psychological support may be delivered in other settings formally collaborating with the PCU in a network	3. Obbligatorio – un anno
		4. Follow up of patients on active surveillance and watchful waiting should be delivered by the PCU's interdisciplinary and multiprofessional team or in other settings formally collaborating with the PCU in a network	4. Obbligatorio – un anno
		5. Patients' follow-up care and rehabilitation should be guided by the PCU	5. Obbligatorio - un anno

**tmd**  
uro onco

TEAM MULTIDISCIPLINARE URO ONCOLOGICO

Nr	Standard	Substandards	Tipo / tempistica
5	PCU guidelines/protocols	Evidence-based written guidelines used for diagnosis and for the management of prostate cancer at all stages should be clearly identified	Obbligatorio - subito
		Protocols should be agreed upon by the core team members; new protocols and protocol amendments should be discussed in the core team	Obbligatorio - subito
6	PCU Documentation audit	1. A minimum set of variables should be recorded electronically in a database: diagnosis, pathology, surgical treatments, radiotherapy, brachytherapy, adjuvant treatments, observational strategies, palliative treatments, clinical outcomes and follow up, including side effects and complications.	1. Obbligatorio – subito per la raccolta; un anno per la raccolta in format elettronico
		2. Data must be available for audit.	2. Obbligatorio – due anni
		3. Minimum outcome for mandatory quality indicators (QI) should be achieved.	3. Obbligatorio – tre anni
		4. Performance and audit figures must be produced yearly and set alongside defined quality objectives and outcome measures	4. Obbligatorio – tre anni
		5. Internal audit meeting should be held at least twice a year to review QIs and amend protocols as necessary	5. Obbligatorio – tre anni

Nr	Standard	Substandards	Tipo / tempistica
<b>Section 2 - Standards and items to set up a PCU: Core Team</b>			
7	PCU core team general – mandatory requirements	1. Core team members spend an agreed amount of their time working with prostate cancer and undertake continuing professional education on a regular base	1. Obbligatorio – subito
		2. At least one member of each discipline of the core team (Urology, Radiation Oncology, Medical Oncology, Pathology) should participate in the interdisciplinary and multiprofessional meetings. Members of the core team may mutually agree on documented exception to the rule.	2. Obbligatorio – subito
		3. Specialists of the non core team should participate on demand.	3. Obbligatorio – subito
8	PCU core team: <u>urologist</u>	1. Two or more urologists specially trained in prostate disease diagnosis and treatment	1. Obbligatorio – un anno
		2. At least 50 cases between radical prostatectomies and patients included in active surveillance protocols per year per unit	2. Obbligatorio – un anno
		3. Spending approximately 50% or more of their working time in prostate disease	3. Obbligatorio – un anno
		4. Contractual sessions should be guaranteed to attend clinics, interdisciplinary and multiprofessional team meetings and audit meetings	4. Obbligatorio – subito

<b>Section 6 - Standards and items to set up a PCU: organisation and case management</b>			
33	PCU Availability of different services and treatment/observational options	1. Availability of clear and easy-to-understand written and electronic information sheets for patients on diagnosis, treatment/observational options, follow up, rehabilitation programs, as decided in the Interdisciplinary and Multiprofessional Team Meeting and recommended by national/international guidelines	1. Obbligatorio – subito
		2. Availability of information sheets for patients on certified sperm preservation units on a regional level, patient groups and other potential sources of support.	2. Obbligatorio – subito

**tmd**  
uro onco

TEAM MULTIDISCIPLINARE URO ONCOLOGICO

Nr	Standard	Substandards	Tipo / tempistica
34	PCU Availability of different services and treatment/observational options	1. The diagnosis of prostate cancer on biopsy or following TURP should be communicated by a urologist member of the core team (never by letter or on the telephone).	1. Obbligatorio – subito
		2. It would be advisable that any of the professionals offering psychological support be present, where available.	2. Facoltativo
		3. A suitable room with sufficient privacy is necessary. The urologist should refer the patient to the clinic for newly referred prostate cancer patients for advice on treatment or observational strategies.	3. Obbligatorio – subito
35	PCU Treatment and observational setting	1. Active surveillance and watchful waiting should be managed according to protocols stating inclusion and discontinuing criteria.	1. Obbligatorio – subito
		2. Patients should be followed up in the PCU or by physicians formally collaborating with the PCU in a network.	2. Obbligatorio – subito
36	PCU Treatment and observational setting	1. Hormonal therapy will be prescribed by the interdisciplinary and multiprofessional team and according to national/international guidelines and can be administered by general practitioners formally collaborating with the PCU in a network in the most appropriate context (eg. in the community).	1. Obbligatorio – subito

**tmd**  
uro onco

TEAM MULTIDISCIPLINARE URO ONCOLOGICO

Nr	Standard	Substandards	Tipo / tempistica
37	PCU Treatment and observational setting	1. Chemotherapy with cytotoxic drugs or immunological therapies should be prescribed by a certified specialist member of the core team trained on the use of drugs with prostate cancer patients.	1. Obbligatorio – subito
		2. Chemotherapy and immunological therapies should be administered in dedicated facilities or at a local hospital that has proper facilities, formally collaborating with the PCU in a network, under the supervision of the core team.	2. Obbligatorio – subito
38	PCU Equipment	1. The Unit must have organized access to all necessary imaging equipment for prostate disease: conventional radiology, TRUS, bone scan, CT, PET-CT and MRI.	1. Obbligatorio – subito
		2. The minimum equipment for a Radiotherapy Service must be two $\geq 6$ MV units, a brachytherapy unit, a simulator and a computerized planning system and allow to deliver 3D-CRT and IMRT. If the brachytherapy service is not part of the PCU, the networking collaboration needs to be ruled by a formal agreement.	2. Obbligatorio – subito
		3. There must be a Radiation quality control program.	3. Obbligatorio – subito
		4. The Unit must be equipped with appropriate pathology equipment: processors, microtomes, staining machines and immunostainers.	4. Obbligatorio – subito
		5. All equipment should be well maintained and certified.	5. Obbligatorio – subito
